

Fanotec Lens Ring Mount is a modular design. Each model consists of an outer metal ring, an inner plastic ring and an Arca Swiss compatible lens ring plate. This modular design enables rapid development of different models for compatible lenses at a much reduced cost. It also makes possible for customers to reuse some components when they change the lens, thus reducing the cost of upgrade.

Below are our current models of lens ring mounts, using different metal ring (LR) and lens ring plate (LRP) and plastic insert specific for the lens.

Supported Lens Models	Metal Ring	Lens Ring Plate	Plastic Insert Name ^a
Bell and Howell fisheyes -->same as Samyang fisheyes ^b	-	-	-
Bower fisheyes -->same as Samyang fisheyes ^b	-	-	-
Canon EF 8-15mm f/4 L USM Fisheye ^c	LR1	LRP45X / LRP45X2 ⁱ	Canon 8-15mm fisheye
Canon EF 8-15mm f/4 L USM Fisheye	LR2W ^j	LRP45X / LRP45X2 ⁱ	Canon 8-15mm fisheye V2
Canon EF 15mm f/2.8 Fisheye	LR3	LRP40	Canon 15mm fisheye
Coastal Optics 4.88mm f/5.2 185° Fisheye	LR4	LRP45	Ipix 4.88mm fisheye
Falcon fisheyes -->same as Samyang fisheyes ^b	-	-	-
Ipix 4.88mm f/5.2 185° Fisheye	LR4	LRP45	Ipix 4.88mm fisheye

Yasuhara Madoka 180 Sony E-Mount	LR6	LRP35	Madoka 180 for E-Mount

Remarks:

List updated: 24 September, 2014

^a Plastic inserts are made for the lens(es) named. Some are found to fit more lenses.

^b Samyang is also rebranded as Bell and Howell, Bower, Falcon, Pro-Optic, Rokinon, Walimex Pro, etc.

^c LRP40 was used in first batch and replaced free of charged upon request. LRP45X used later for better stability for larger tilt angle on R10. LRP40 works fine for R1.

^d 8mm spacer block added to increase clearance from lens to LRP.

^e First batch used reversed LR5 and LRP35. Installation was more difficult and might scratch the lens body if not careful. NOT compatible with Olympus OM-D E-M5.

^f This version has extra clearance for the OM-D E-M5 view finder housing. It has a slightly bigger nadir foot print. Other M43 users should buy normal ring for M43, unless they plan to use it on Olympus OM-D as well.

^g LRP35 was used in first batch and replaced free of charged. LRP45X used later for better stability for larger tilt angle.

^h Use same inner plastic insert from Sony E-Mount 16mm, 18-55mm.

ⁱ LRP45X2 adds 2 more countersunk holes to the plate. It can potentially replace LRP45. Note that LRP NPP will be differenters from LRP45. When mounting screws are installed to the front holes, LRP NPP is same as LRP45X.

^j LR2W adds cut out windows to LR2 so that focus scale can be read, and in some cases switches on lens can be accessed. The windows support cameras mounted in landscape or portrait orientations.

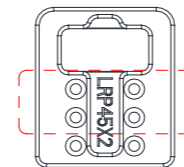

^k Replacement lens mounts have been developed to allow the Samyang 7.5mm to be used in these mounts. The replacement mounts allow easy attachment of LF-2 lens foot and LRP at various useful roll angles, saving the cost of a lens ring.

Outer Metal Ring Specifications

Metal Ring	LR1	LR2	LR2W	LR3	LR4	LR5	LR6
Dimensions Dia. x Depth	ø83 x 24mm	ø83 x 20mm	ø83 x 20mm	ø76 x 24mm	ø72 x 24mm	ø67 x 22mm	ø69 x 15mm

Lens Ring Plate Specifications

Lens Ring Plate	LRP35	LRP40	LRP45	LRP45X	LRP45X2	LRP50	LRP70
Dimensions W x L x H	38.1 x 35 x 9mm	38.1 x 40 x 9mm	38.1 x 45 x 9mm	38.1 x 45 x 9mm	38.1 x 45 x 9mm	38.1 x 50 x 9mm	38.1 x 70 x 9mm

LRP45X2, without otherwise specified, use the 4 holes at the front.
